1. ROGIERS Wizard uitvoeren

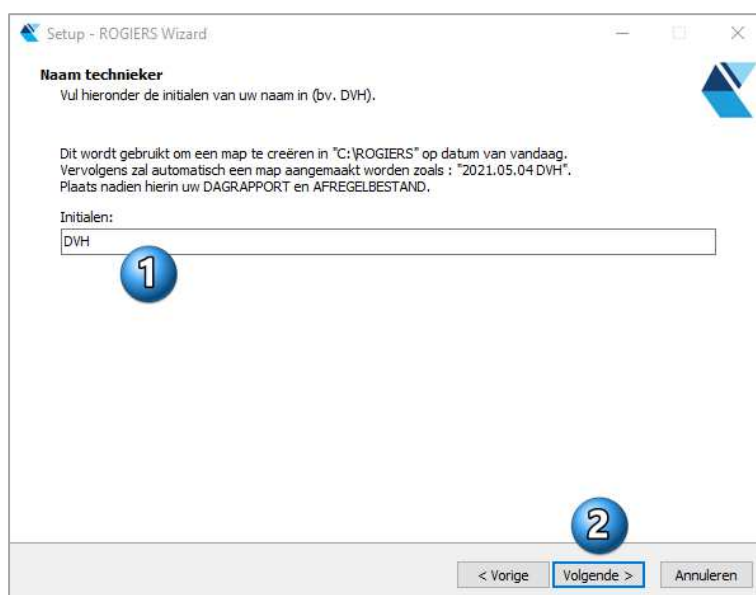

Met deze installatie wordt de map "C:\ROGIERS" aangemaakt met een reeks bestanden voor andere software, Windows talen, Maestro programma's, ...

- Vooraleer de installatie uit te voeren, sluit alle applicaties. Opnieuw opstarten van de computer is vereist.
- Kopieer " **ROGIERS Wizard 22.x.exe** " van uw USB stick naar het bureaublad van de machine, OF voer de installatie onmiddellijk uit door op het bestand te dubbelklikken.
- U mag meerdere keren dezelfde installatie uitvoeren, dezelfde bestanden worden gewoon weer overschreven. Mappen of bestanden in " **C:\ROGIERS** " die reeds aanwezig waren worden niet verwijderd.

U kan verder gaan met de knop 'Volgende > ' :

- Vervolgens vult u de **initialen** van uw naam in, ter herkenning in de map "C:\ROGIERS".

- e. Daarna kiest u het type installatie om uit te voeren, Klik op 'Volgende >' om verder te gaan :

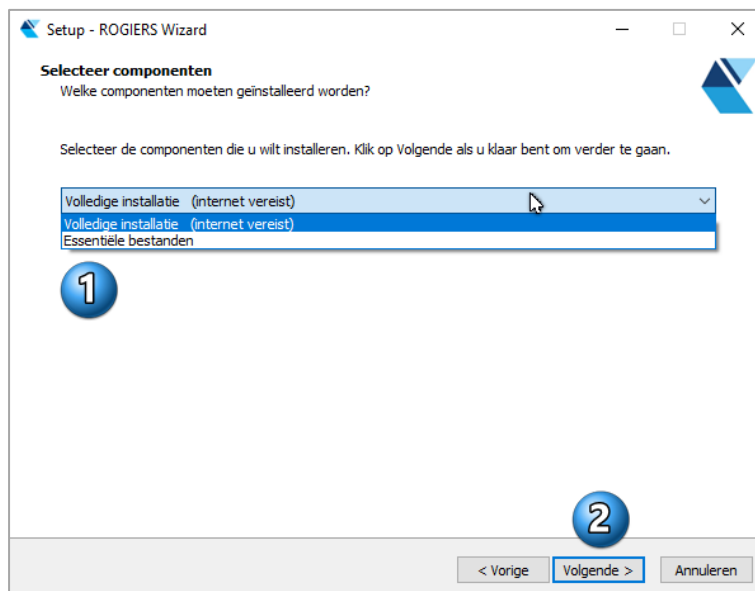

- Volledige installatie (internet vereist)

> Kies enkel deze optie indien de computer daadwerkelijk internet heeft!

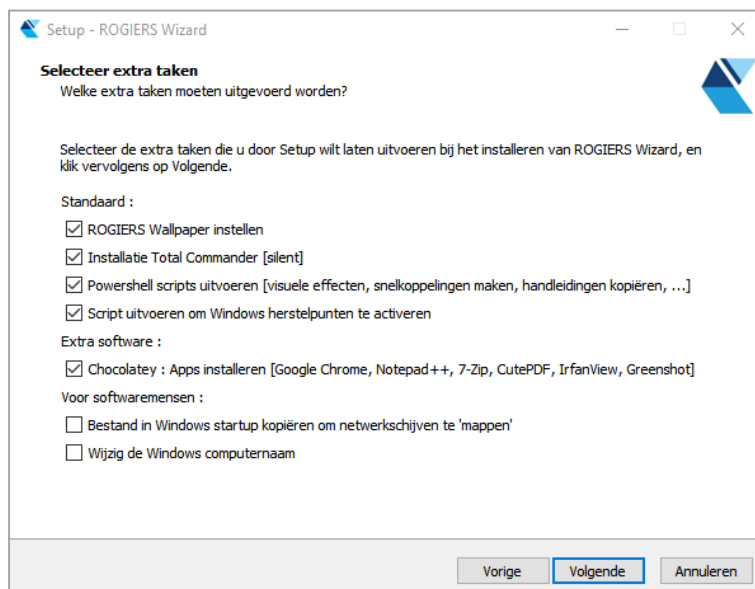

Hiermee wordt onder andere extra software van internet gedownload.

- Essentiële bestanden

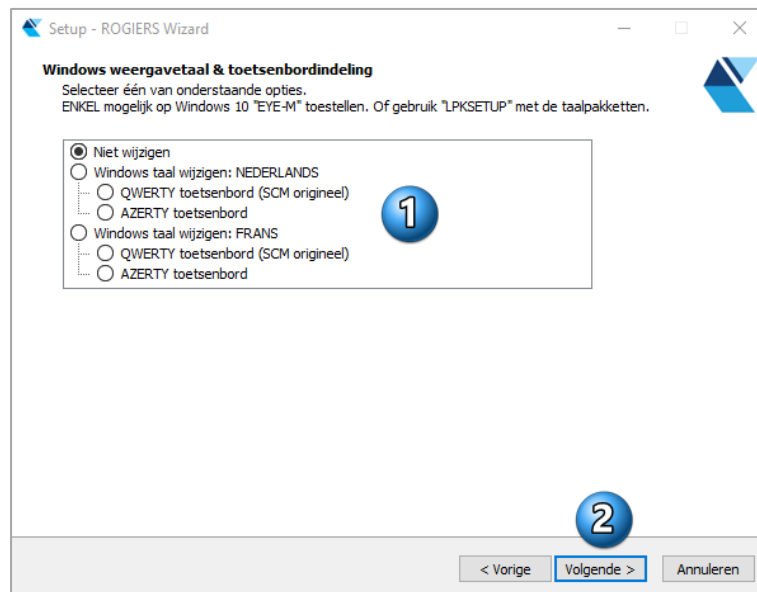

> Dit kopieert de map "ROGIERS" onder "C:\\" met een reeks vereiste bestanden.

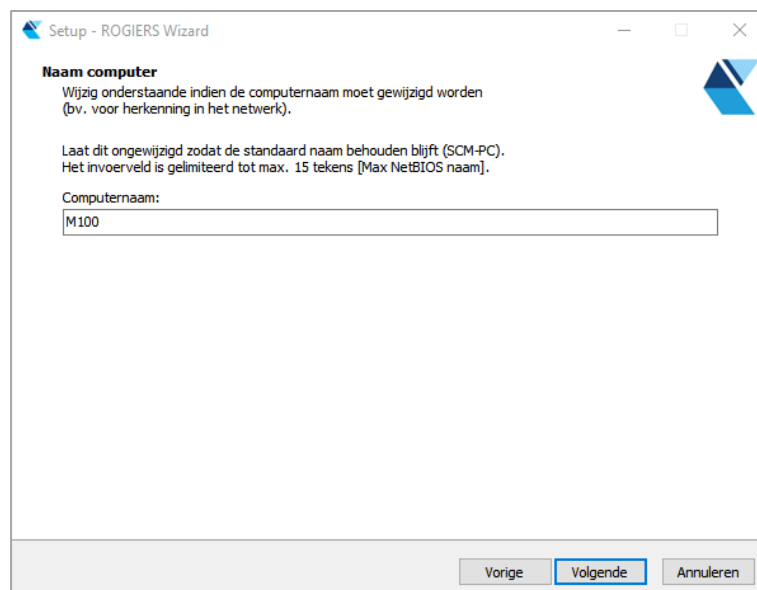

- f. Nadien kan geselecteerd worden wat allemaal extra moet uitgevoerd worden. Standaard laat u alles aangevinkt. Klik op 'Volgende >' om verder te gaan :

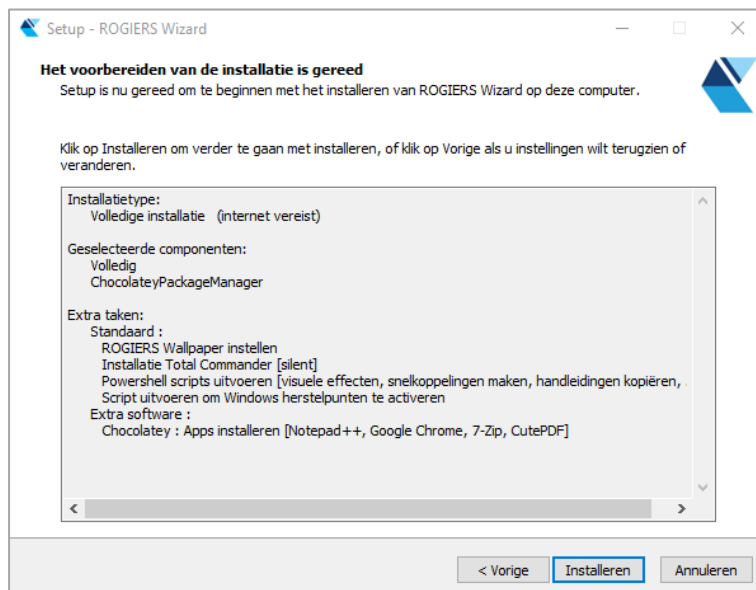

- g. Kies vervolgens de weergavetaal en/of correcte toetsenbordindeling. Klik op 'Volgende >' om verder te gaan :

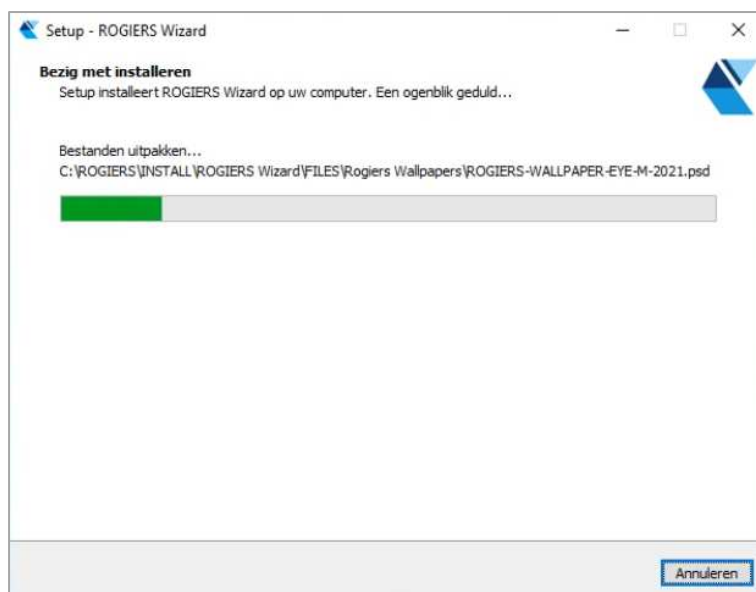

- h. ENKEL indien de taak 'Wijzig de Windows computernaam' werd aangevinkt :
Standaard niet zichtbaar

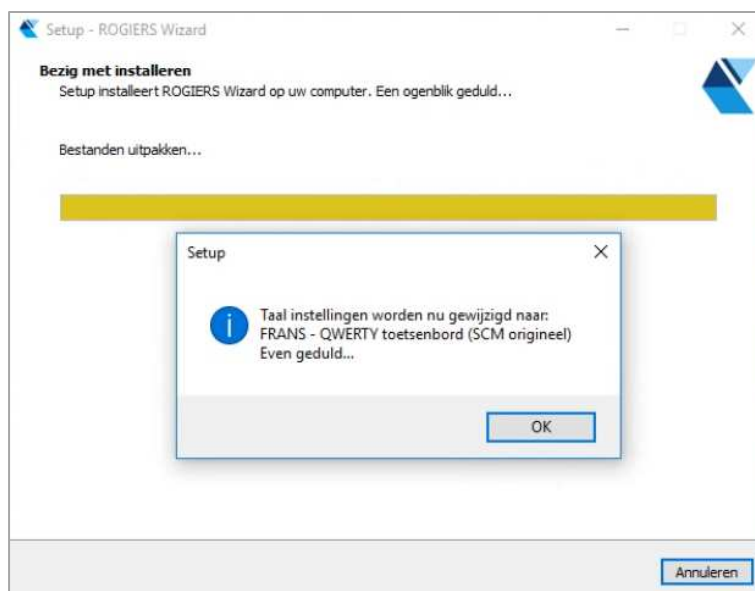

- i. Er volgt nogmaals een oplijsting van de gekozen opties, Klik vervolgens op 'Installeren'.

Daarna doorloopt de Wizard een aantal vensters. **Er is hierbij geen tussenkomst vereist.** Enkel indien gekozen werd om de Windows taal te wijzigen, dient men op 'OK' te klikken :
